Republicans Determined to Try to Wipe Out the Ugly Deficit.

BLUE FOR JAMESTOWN

But the Friends of the Exposition Ready to Make a Strong Fight.

(From Our Regular Correspondent.) WASHINGTON, D. C., October 16 .- The almost unbroken series of declarations by the leaders in the Senate and House, as they come in to Washington to get ready for the next session of Congress, is in favor of economy as one of the methods of getting rid of the ugly defielt in the treasury, which is a source of many nightmures on the part of the Republican leaders. One after another they declare that Congress has got to reduce the national expense account in order to cut out the deficit. All of these utterances as to the policies that will be followed by Congress next winter do not bode good to many ambitious projects It is more than probable that the Congressman who wants to get a public building will go home disappointed, and that the one who wants an appropriation for his district, will also have to tion for his district, will also have to explain to his constituents later why he did not get it. All this is for the simple reason that the Republicans know that a deficit is an ugly handicap in a political campaign, and will postpone everything that can be postponed, and cut out everything that can be cut out in order to save themselves from going before the people in the Congressional campaign of 1906 with apologies for a deficit.

Virginians are vitally interested in this matter. The Jamestown Exposition is to be held in 1907 and additional Fed-eral appropriations must be forthcomized to make it the succession. is to be held in 1907 and additional Federal appropriations must be forthcoming to make it the success that it deserves. But will the economy crazed Republicans permit this appropriation to go through? This is a question that is hard to answer. There are two factors in the situation. On the side of the appropriation to for the side of the appropriation is a region decrul personal strength. He will put in his message a ringing declaration in favor of the appropriation couched in as strong terms as the friends of the Exposition can desire. In addition to this, he will use whatever additional industries he possesses to see that the exposition gets the recognition it merits, in the shape of a good, round Federal appropriation. Added to this will be a hearty support by some two-thirds of the membership of the House, if the leaders see fit to let the matter come to a vote, and also a strong support in the Senate.

Where Danger Lies.

Where Danger Lies.

Where Danger Lies.

But against all these elements of strength will be plited the leaders of the House. There le the dangers, that beset the pathway of the desired Federal appropriation. "Uncle Joo" Cannon is an opponent of the exposition at all times, and now that there is a deficit, his Yankee husiness notions make him more so than ever. It was only after the most persistent and earnest entreaty that he agreed to recognize Mr. Maynard, last winter to ask for a suspension of the rules while the House passed a bill appropriating a mensily little quarter of a million dollars for the exposition. And that came only after the most insistent firging of President Roosovelt himself. The Republican leaders in the House are particularly leaders in the House are particularly afraid of losing the control of the House, afraid of losing the control of the House, and are going to oppose every expenditure that they can oppose. Speaker Camon and his associates on the Committee on Rules are likely to hold the fortagainst the Jamestown appropriation as long as they can. Whether the opposing forces can command the situation is not known. There will be a great fight made by both sides to the controversy, and it must be confessed that the situation does not look altogether an easy one for the exposition.

Many Mineral Springs.

The Geological Survey has just issued a bulletin on the production of mineral waters. It shows that Virginia ranks third in the United States in the number of mineral springs within her boundaries. These are only those which have had waters placed on the market at one time or another. If every mineral spring in Virginia were considered, as every one in New York and Massachusetts are, there is no doubt but that Virginia would rank first. As it is, she is only one behind New York, which has sixty springs of commercial rating, and eleven behind Massachusetts, which has seventy.

Virginia is ahead of all the other States in the showing of the renow. The shows another. If every mineral spring in

CONTAGIOUS BLOOD POISON KING OF ALL DISEASES

To Contagious Blood Poison rightfully belongs the name King of all Diseases. It is the most powerful of all human allments—corrupting every part of the body and wrecking and ruining the lives of those unfortunate enough to contract it. When the first sign appears in the form of an insignificant sore or ulcer, few persons realize that the deadly virus has entered the blood; but so potent is the poison that one drop will vitiate and pollute the purest and healthiest blood, and in a short time the degrading and horrible symptoms begin to appear. The mouth and throat ulcerate, the glands in the neck and groins swell, the hair and eye-brows fall out, copper-colored spots appear on the body, and in the latter stages of the disease the poison even works down and destroys the bones. No other disease is so highly contagious, and many have contracted it and suffered its awful consequences through a friendly hand-shake, handling the clothing of one afflicted with it, or drinking from the same vessel. S. S. S., The King of Blood Purifiers, is the only cure for Contagious Blood Poison. It goes down into the circulation and forces out every particle of the virus. It is nature's antidote for this peculiar poison, and cures the disease in all its stages, and cures it permanently. S. S. S. does not hide or cover up any of the poison to break out in future years, but so completely eradicates it from the blood that no signs pletely eradicates it from the blood that no signs pletely eradicates it from the blood that no signs all its stages, and cures for home treatment and any medical advice you desire will be furnished by our physicians without charge.

Washington Street, between Vesey and Park Place, is not a good place for a hungry man to walk if he is temporarily without funds, nor is it to be recommended to a stroller who is suffering with that form of indigestion which the sight of food brings on with its worst pangs. At this time of year, when the mild weather permits such displays, one can see there every variety of fruit that comes to this market; peanuts are advertised on every corner, fish and flesh are decidedly in evidence both to the eyes and the nostrils. Men in blood-stained white coats carry carcasses of animals on their shoulders along the crowded sidewalk; other men trundle huge cheeses, as hig as millstones, on hand trucks from warehouse to warehouse.
